and all drivers installed properly 'the pastebin link did not work for me, but the gist of it was the dmesg showed there was an "Error inserting..." code Ben64, it looks like line 55 You may need to try nomodeset when you boot, or maybe the windows 7 install dvd has the driver it needs also pavlos, I was just going to try that out... actually, I just rebooted with the Windows 7 DVD in... it doesn't do anything after the splash screen pragmaticenigma, that dmesg looks good did you test it from a liveUSB session before trying to install Ubuntu? Also you could try the windows drivers, assuming it uses the same drivers pragmaticenigma, yes, I can boot liveusb fine xamithan: Is that an option? Windows already installed... is it possible to install them into the MBR or Grub? I will check if the Windows DVD has that driver, brb Ok... none of them have the driver Its possible yes, I never tried it that way, maybe you have to use wine to get them working, I used to use that to try to load windows drivers on a liveusb xamithan: Do you think it's possible to install the drivers into the MBR? Not to my knowledge. I'm not really an expert though ok... I'm going to try the nvidia drivers from the Ubuntu install DVD, brb Hi, is it possible to link a git repo to be tracked inside of a vcs repo that contains binary assets? it is not the same... 82157476af
